

Transforming into digital supply chains

June 4–5, 2024

The McKinsey Supply Chain Executive Academy
Châteauforn' Rome | Italy

The McKinsey Supply Chain Executive Academy is a two-day program dedicated to bringing supply chain leaders across industries together to be inspired by the latest trends in supply chain management. The June 2024 edition, to be held in Rome, will focus on how to successfully lead digital supply chain transformations that deliver lasting impact while perfectly balancing processes, systems, and people.

We apply a proven mix of expert presentations, hands-on learning, guest speakers, and panel discussions. You will have plenty of opportunity to exchange ideas and experiences with your peers from leading global manufacturing and distribution companies.

The event is designed specifically for heads of supply chain and operations as well as supply chain executives. We offer two complementary academies each year. Our upcoming academies are:

- June 4–5, 2024 (Rome): Transforming into digital supply chains
- October 15–16, 2024 (Kitzbühel): Innovations in supply chain planning and execution

Location

Châteauforn' Rome
Italy
